

ANDAR

60 YEARS OF ENGINEERING EXCELLENCE

Stand alone success but integral to ANDAR

An integral part of the ANDAR business, The Front Store evolved out of the original engineering business. Initially set up to stock materials and parts to service the needs of the very busy engineering workshop, the local community quickly became aware that they could source the parts they required from ANDAR too.

This local demand grew right from the early days and while the exact date that The Front Store started trading as a separate identity is not actually known, an engineering store was established in 1970 on the Seadown Road site.

Since this time The Front Store has grown into a successful standalone business in its own right employing 17 staff, across three stores - Washdyke, Timaru Port and Ashburton - serving a diverse range of customers from Rakaia to the Waitaki Valley.

The Washdyke branch has grown up among a thriving industrial area, servicing manufacturing, agricultural and local process industries to the north of Timaru. Set up in 2005, the Ritchie Street branch is located within the Timaru Port servicing providing, heavy industry, fishing fleets and the needs of the agricultural market to the south of Timaru.

The latest addition to The Front Store family, CM Engineering Supplies, was purchased by ANDAR in 2006 and operates from a site in Moore Street, Ashburton. A well established business, CM Engineering Supplies services a market dominated by heavy industry, a broad agricultural base, manufacturing, a large number of cropping farms and expanding processing factories.

The Front Store lays claim to carrying the largest range of engineering sup-

plies in Canterbury. The business has been built on a philosophy of carrying a broad range, providing excellent customer service and being able to source almost anything to meet a need.

With a slogan that says 'Seriously Good Gear' the company has a reputation of supplying good quality, built to last. Supporting this is the commitment to the core products of bearings and seals, chain and sprockets, v-belts and pulleys, fasteners and a large range of hand tools, power tools, air tools, trailer parts and industrial gearboxes.

Established alongside an engineering workshop, The Front Store is unique in its ability to provide solutions to customer problems. Sales manager Clayton Holland believes that there is nothing better than working with your customers: "A lot of our business is built around keeping people's

plant and machinery running and we understand the importance of getting the right part, on time and at the right price," he says.

The business operates 24 hours per day, 7 days a week - after hours service is provided for those urgent breakdowns.

"Each branch carries a slightly different range of stock to suit their local market and it is this flexibility that allows us to react quickly and service our customer's needs," Clayton said.

With over 190 years of experience within the The Front Store and CM Engineering Supplies teams they are proud to be a part of Canterbury's engineering history and look forward to being a bigger part in its future.

Seriously Good Gear

Patience and Nicholson (NZ) Ltd have been manufacturing drill bits and hacksaw blades since 1962 from its manufacturing base in Kaiapoi just north of Christchurch from its small beginnings we have grown significantly over 45 years and now employ 134 people who are involved in the manufacture and sales of the **Evacut** range of drill bits, hacksaw blades, tool steel and specialized cutting tools we export over 50% of our manufactured products.

In 2005 Patience and Nicholson (NZ) Ltd also acquired Kinchrome (NZ) Ltd and now distribute Kinchrome industrial tools, socket sets, tool storage systems and automotive gear in NZ through various distributors of which Andar and CM Engineering supplies is very supportive and we at P&N NZ thanks them for that support

Patience and Nicholson (NZ) Ltd is a fully owned subsidiary of Sutton Tools Australia a family owned business who compliment our NZ business in manufacturing cutting tools and a large range of high performance cutting tools, Sutton holesaws, taps & dies for the New Zealand and export markets
